Ala
no. 1026

SEASON OF 1926

ENGRAVED AND PRINTED BY THE U.S. GEOLOGICAL SURVEY

ARRANGEMENT BY M. L. LEOPOLD

BE SURE YOU SEE YELLOWSTONE

One important word before you start on your journey. Having come so far, see Yellowstone National Park before you leave. Do not miss anything you can see from your car, or by a reasonable walk. If you ride horseback go on the trails into the wilderness regions.

Two great spectacles are essential.

One is the hot-water phenomena, the geysers and the great terraces and their attendant paint pots and hot springs.

The other is the exquisite canyon of the Yellowstone. Two views of this, famous the world over, will suffice if time is short. One of these, Inspiration Point, is on the left or west rim; the other, reached by crossing Chittenden Bridge just above the Upper Fall, is Artists Point, where Moran painted his celebrated picture that hangs in the Capitol at Washington. Five miles of driving will take you within a few steps of both.

Do not turn left at Canyon Junction toward the Geysers until you have seen the Grand Canyon which is less than a mile away.

If you want to walk trails that are among the most scenic in the world, leave your car at Canyon Hotel or Permanent Camp, and take the rim trails to Artist and Inspiration Points. The Artist Point Trail is one mile in length, the Inspiration Point Trail is two miles long.

WE INSIST that you see these great spectacles, but for the rest, you must choose for yourself. You have your automobile map in this guide, and the rangers are here to answer your questions. One thing we strongly advise: That is, from the Canyon **TAKE THE ROAD NORTH OVER DUNRAVEN PASS**. This is a wonderfully scenic road, wide and safe. Do not miss it. Take our advice, not the words of some other motorist who may not have had your capacity to appreciate and enjoy a magnificent view of mountains and forests.

AND NOW, GO TO IT.

GUIDE BOOKS—GET ONE

You will add greatly to the enjoyment of your trip if you will procure a guidebook of the Park, and refer to it as you go from one point of interest to another. At headquarters and at the ranger stations the National Park Service distributes free of charge a Government booklet describing all of the interesting features of the Park, the geyser and hot-springs phenomena, the canyons, lakes, mountains, forests, birds, animals, and fish. This booklet also contains the rules and regulations of the Park. It has a few illustrations.

The Haynes guidebook, an elaborately illustrated volume, is on sale in the hotels, camps, stores, picture shops, and Park information office at 75 cents.

Put this folder in your guidebook where you can continue to refer to it.

**DRIVE CAREFULLY
AND DO YOUR SHARE
IN KEEPING THE ROADS SAFE
SPEED LIMITS 12 MILES ON CURVES
AND 25 MILES ON STRAIGHT STRETCHES**

THE GRAND LOOP ROAD

The Grand Loop Road is 150 miles in length, and is the highway system of the Park that makes accessible its greatest scenic features—The Grand Canyon of the Yellowstone, the Geysers, the Hot Spring Terraces, Lake Yellowstone, Mt. Washburn, and Dunraven Pass.

You will not see Yellowstone National Park if you do not see every mile of the Grand Loop Road, except the 11-mile section, or short-cut, between Canyon Junction and Norris Junction.

Dunraven Pass and Tower Falls we again especially urge you to visit. On their section of the Grand Loop Road, the scenery is magnificent, and here too are the most beautiful wild flower gardens of the Park. Be sure you do not miss them.

OTHER PARK ROADS

Yellowstone's highway system embraces altogether 356 miles of roads, not all of which are as well improved as the Grand Loop.

There are the four approach roads to the Grand Loop from the main gateways—The North or Gardiner, the West or West Yellowstone, the East or Cody, and the South or Snake River entrances; there is the unimproved road to the picturesque mining camp of Cooke City just beyond the northeast corner of the Park; there is the road from the Northwest or Gallatin Entrance to West Yellowstone, and there are 58 miles of roads outside the Park that belong to the system. There are 28 miles of the East approach through the Shoshone National Forest, and 30 miles of the South approach through the Teton National Forest from Moran to the Park line.

DIRECTION OF TRAVEL

In order that your tour of the Yellowstone may be comfortable, safe and complete, we route traffic around the Grand Loop Road in one direction only, that is in the direction opposite to the hands of a clock.

For instance, if you enter the Park at the Eastern or Cody Gateway, you should go first to Lake Yellowstone, thence on the Grand Loop to the Grand Canyon, thence to Tower Falls, thence to Mammoth Hot Springs, and finally to the Geysers. Or, if you enter at the Western Entrance, you should first go to the Geysers, thence to Lake Yellowstone, and on around the Grand Loop.

On certain sections of the Grand Loop, and at certain hours, this traffic control plan is modified. Consult Rule 7 of the Automobile Rules and Regulations below for further information, but do not deviate from this control system except in emergency. Your trip will be more enjoyable and complete if you take the regular route.

THE PARK MILEPOST SYSTEM

The milepost signs in Yellowstone National Park are diamond-shaped steel signs with raised letters, which are in every case initials of a junction point on the loop road system or a Park gateway. As a measure of economy these signs have not always been placed exactly 1 mile apart. Fractions of miles have sometimes been dropped in order that two mileage signs might always be placed on one steel post. For instance, between Gardiner, the north gateway, and Mammoth Hot Springs a speedometer indicates that the distance is slightly over 5 miles, yet the mileage signs state the distance as exactly 5 miles.

The following is a key to the milepost initials.

- N. E. North entrance, at Gardiner, Mont.
- W. E. West entrance, at West Yellowstone, Mont.
- E. E. East entrance, near Cody, Wyo.
- S. E. South entrance, near Moran, Wyo.
- M. S. Mammoth Hot Springs, where the north approach road joins the loop system.
- N. J. Norris Junction near Norris Geyser Basin, where a road leads directly across the Park to the Grand Canyon of the Yellowstone.
- M. J. Madison Junction, where the west approach road joins the loop system.
- O. F. Old Faithful, at the head of Upper Geyser Basin.
- W. T. West Thumb of Yellowstone Lake, where the south approach road joins the loop system.
- L. J. Lake Junction, where the east or Cody approach road joins the loop system.
- C. J. Canyon Junction, where a road leads directly across the park from the Grand Canyon of the Yellowstone to Norris Basin.
- T. J. Tower Falls Junction, where the road to the buffalo ranch and Cooke City leaves the loop system.
- MT. W. Summit of Mount Washburn.

There is a ranger station at each of the above entrances and junction points.

PLEASE REPORT CARVING OF INITIALS ON THE BEAUTIFUL AND DELICATE GEYSER FORMATIONS

FIRE—DESECRATION—ARREST—FINE—IMPRISONMENT

In addition to the automobile rules the following sections of the rules and regulations, which are the law of the Park, should ever be kept in mind and faithfully observed:

1. **PRESERVATION OF NATURAL FEATURES AND CURIOSITIES.**—It is forbidden to remove or injure the sediments or incrustations around the geysers, hot springs, or steam vents; or to deface the same by written inscriptions or otherwise; or to throw any object or substance into the springs or steam vents; or to injure or disturb in any manner or to carry off any of the mineral deposits, specimens, natural curiosities, or wonders within the Park; or to ride or drive upon any of the geyser or hot spring formations, or to turn stock loose to graze in their vicinity.

The destruction, injury, defacement, or disturbance in any way of the public buildings, signs, equipment, or other property, trees, flowers, vegetation, rocks, mineral, animal, bird, or other life is prohibited: *Provided*, That flowers may be gathered in small quantities when, in the judgment of the Superintendent, their removal will not impair the beauty of the park.

2. **CAMPING.**—In order to preserve the natural scenery of the Park and to provide pure water and facilities for keeping the Park clean, permanent camp sites have been set apart for tourists visiting the Park in their own conveyances and no camping is permitted outside the specially designated sites. These camps have been used during past seasons; they will be used daily this year and for many years to come. It is necessary, therefore, that the following rules be strictly enforced for the protection of the health and comfort of the tourists who visit the Park in their own conveyances:

(a) Combustible rubbish shall be burned on campfires, and all other garbage and refuse of all kinds shall be placed in garbage cans, or, if cans are not available, placed in the pits provided at the edge of camp. At new or unfrequented camps garbage shall be burned or

carried to a place hidden from sight. **Keep the camp grounds clean.**

(b) There are thousands of visitors every year to each camp site and the water in the creeks and streams adjacent is not safe to drink. The water supply provided is pure and wholesome and it must be used. If, however, the water supply is not piped to grounds, consult rangers for sources to use. Tourists out on hiking parties must not contaminate watersheds of water supplies. They are indicated by signs, pipelines, and dams. **There is plenty of pure water; be sure you get it.**

(c) Campers and others shall not wash clothing or cooking utensils or pollute in any other manner the waters of the Park, or bathe in any of the streams near the regularly traveled thoroughfares in the Park without suitable bathing clothes.

(d) Wood for fuel only can be taken from dead or fallen trees.

3. FIRES.—Fires constitute one of the greatest perils to the Park; they shall not be kindled near trees, dead wood, moss, dry leaves, forest mold, or other vegetable refuse, but in some open space on rocks or earth. Should camp be made in a locality where no such open space exists or is provided, the dead wood, moss, dry leaves, etc., shall be scraped away to the rock or earth over an area considerably larger than that required for the fire. Fires shall be lighted only when necessary, and when no longer needed they shall be completely extinguished and all embers and bed smothered with earth or water so that there remains no possibility of reignition.

Especial care shall be taken that no lighted match, cigar, or cigarette is dropped in any grass, twigs, leaves, or tree mold.

5. BEARS.—Molesting or teasing the bears is prohibited.

14. DOGS AND CATS.—Dogs and cats are not permitted in the Park, except that, by special authority of the Superintendent, they may be transported through the Park, provided they are kept under leash or in a crate while within the confines of the Park.

18. FINES AND PENALTIES.—Persons who render themselves obnoxious by disorderly conduct or bad behavior shall be subjected to the punishment hereinafter prescribed for violation of the foregoing regulations, or they may be summarily removed from the Park by the Superintendent and not allowed to return without permission in writing from the Director of the National Park Service or the Superintendent of the Park.

Any person who violates any of the foregoing regulations shall be deemed guilty of a misdemeanor and shall be subject to a fine of not more than \$500 or imprisonment not exceeding six months, or both, and be adjudged to pay all costs of the proceedings.

AUTOMOBILE AND MOTORCYCLE REGULATIONS

You should consult your guidebook for the complete rules and regulations of the Park. The following is an abstract of the motor vehicle rules :

1. The park gateways are open from 6 a. m. to 9:30 p. m. only.
2. Where a car is rented for the park trip, or is a jitney, it cannot be admitted unless the owner has a Government franchise to operate in the Park.
3. Motorcycles are admitted to the Park.
4. Motor trucks are subject to special restrictions and special permit fees.
5. At the Park gateway, a permit, good for the entire season must be procured, and must be kept for identification in the Park.
6. Fees for permits are \$3.00 for automobiles and \$1.00 for motorcycles.

7. (Quoted in full) Direction.—Automobiles shall pass around the road system forming the "loop" in the direction opposite to that of the hands of a clock, as indicated by the arrows printed in red on the automobile guide map. The reverse direction may be taken as follows :

Norris Junction (N. J.) to Mammoth Hot Springs (M. S.) any time, day or night.

Madison Junction (M. J.) to Norris Junction (N. J.) any time of day or night except the periods 9 a. m. to 11:30 a. m., and 2 p. m. to 4:30 p. m.

Upper Geyser Basin (Old Faithful—O. F.) to western entrance (W. E.) any time, day or night.

Canyon Junction (C. J.) to Lake Junction (L. J.) any time, day or night.

Mammoth Hot Springs (M. S.) to Tower Falls, early enough to reach Tower Falls by 1 p. m. Distance 19.6 miles.

Canyon Junction (C. J.) to Norris Junction (N. J.) direct, any time, day or night.

Lake Junction (L. J.) to West Thumb (W. T.) and south entrance (S. E.) (but not Old Faithful—O. F.) any time, day or night.

Summit of Mt. Washburn (Mt. W.), down north side to junction of Dunraven Pass road, thence to Canyon Junction (C. J.) after 3 p. m.

The Superintendent has authority to change routing of cars if necessary.

8. On park roads, automobiles must be 50 yards apart, except when passing; gears must be enmeshed except when shifting; tires and brakes must be in good condition; cars must carry one extra tire.

9. Speed limits are 12 miles on grades and curves ; not exceeding 25 miles per hour on straight stretches.

10. Horns shall be sounded when approaching curves, and before passing other vehicles or pedestrians.

11. Automobiles must be equipped with head and tail lights. Dim headlights when meeting other vehicles.

12. Muffler cut-outs must be closed while passing hotels, camps, and horses.

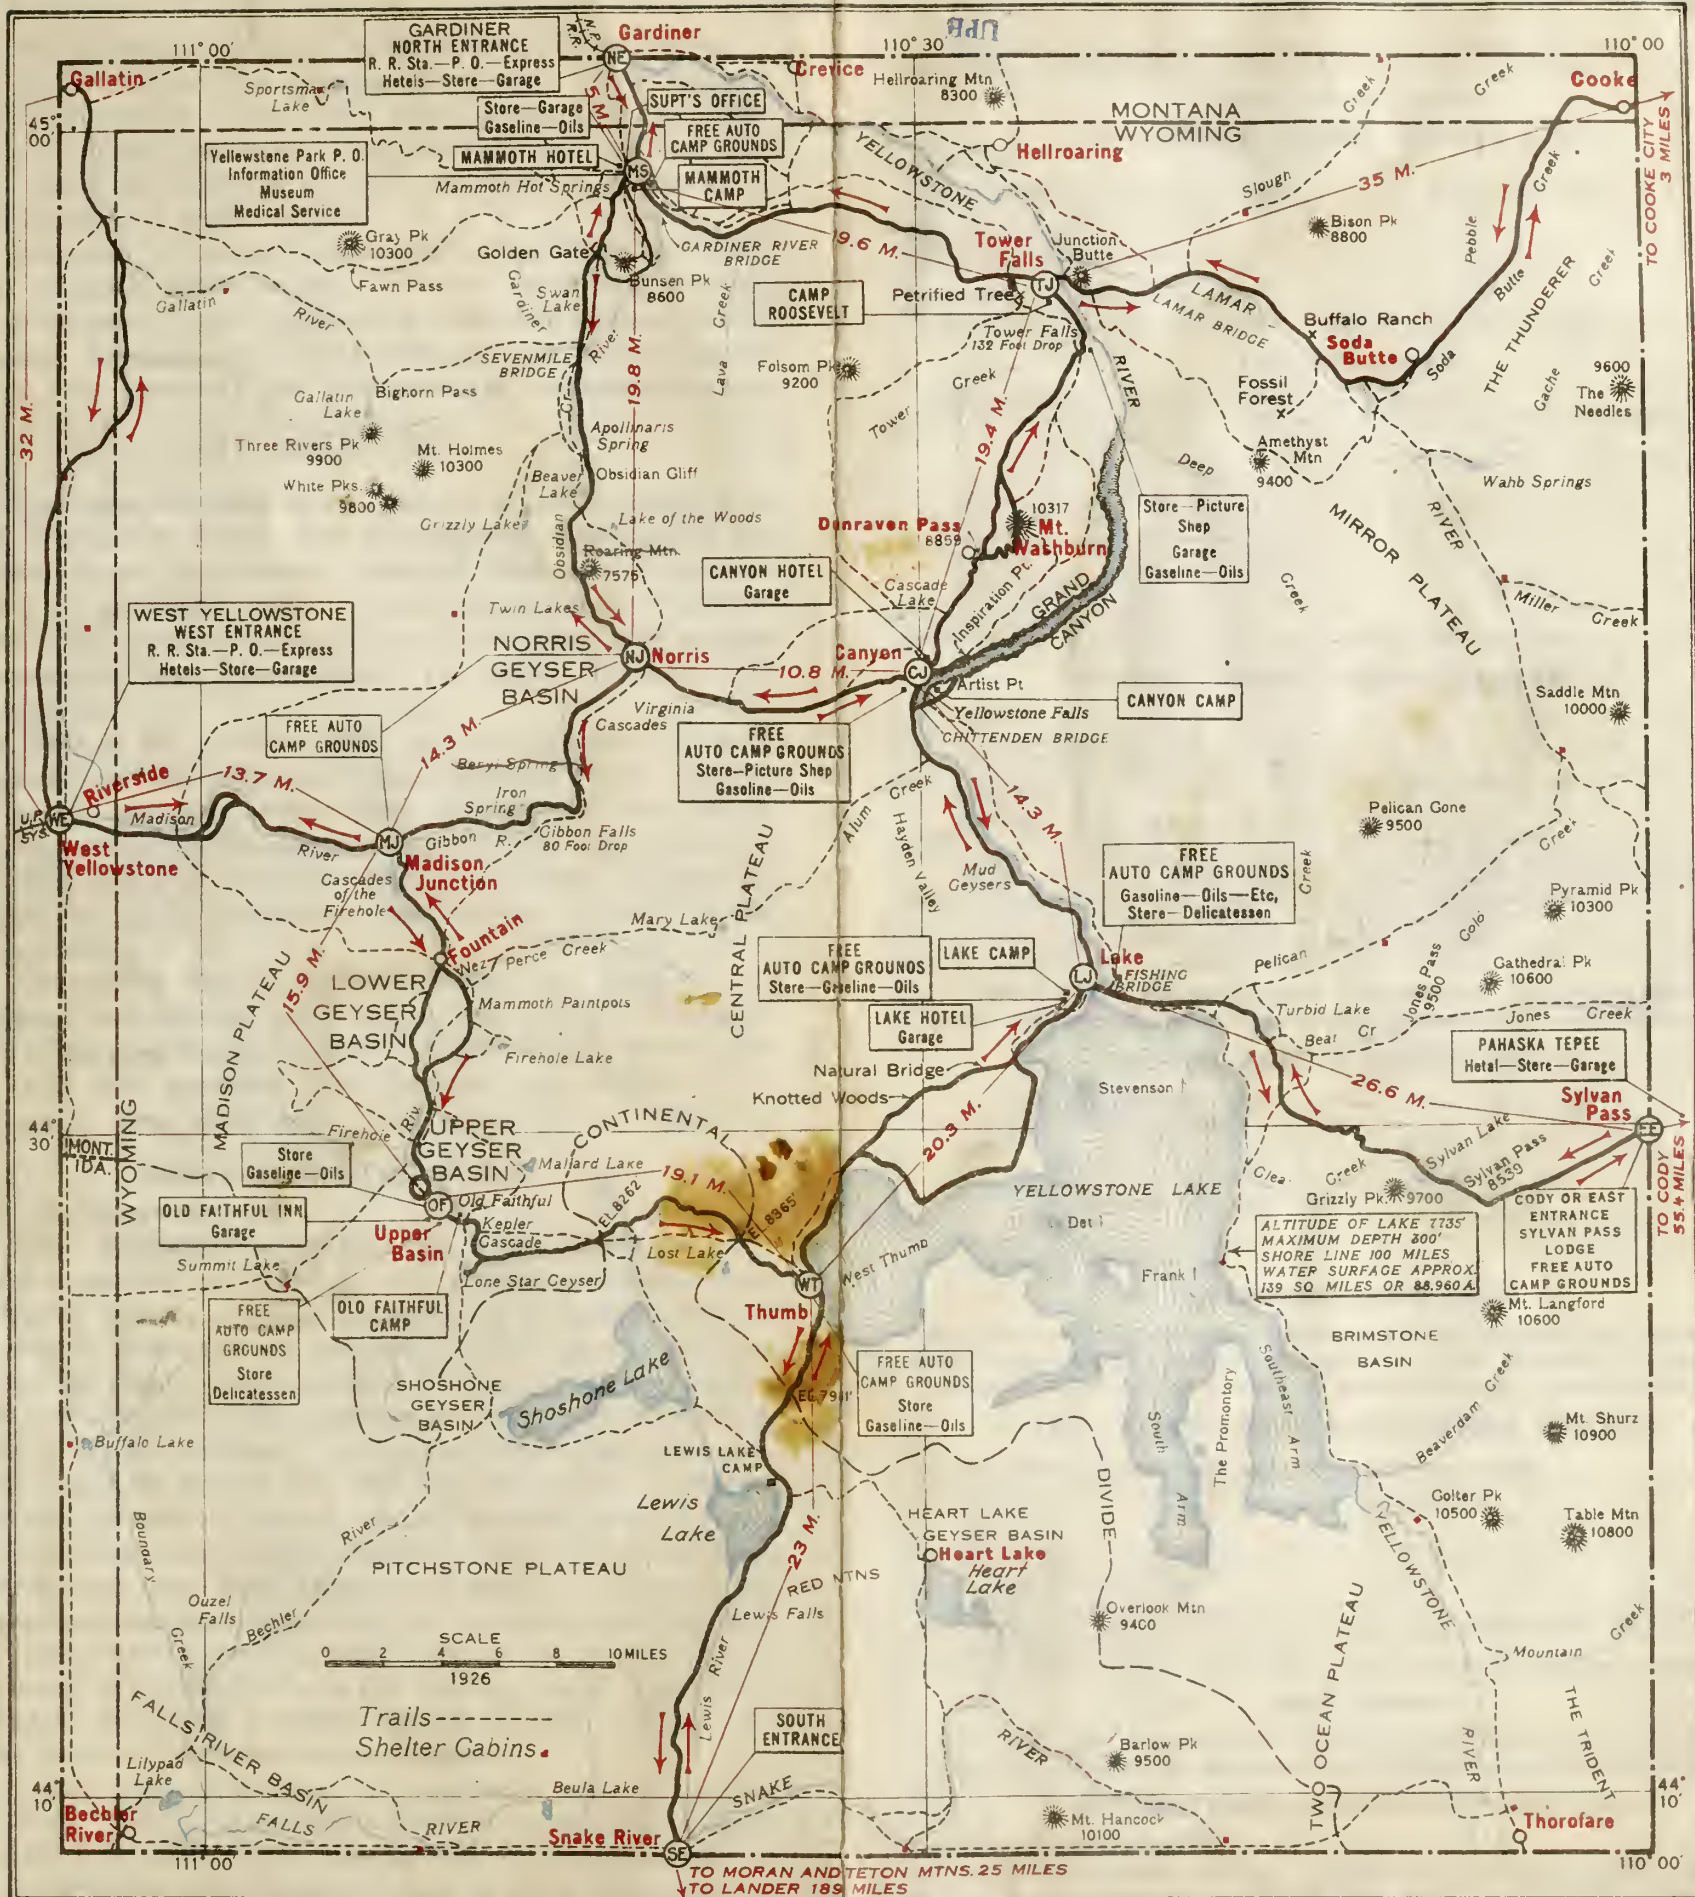

13. Relates to passing teams. Teams have the right of way.

14. Relates to overtaking vehicles.

15. Relates to accidents and stopovers.

16. Violation of the automobile rules and regulations is a misdemeanor and is punishable by a fine of not more than \$500, or imprisonment of not exceeding 6 months or both, plus costs of proceedings, or the automobile permit may be cancelled, and the offender ejected from the Park or any combination of these penalties may be imposed.

GUIDE MAP SHOWING ROADS IN YELLOWSTONE NATIONAL PARK

CAMPING is permitted throughout the Park on specially designated camp sites easily recognized by signs.
 Leave clean grounds for the next camper.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

ADMINISTRATION OF THE PARK

Yellowstone National Park is in charge of the Superintendent, Mr. Horace M. Albright, whose office is at Mammoth Hot Springs, the Park headquarters. Complaints and suggestions should be addressed to this officer in writing. The telephone service is also available for notifying either the Superintendent or nearest ranger station for emergency complaints, reporting of reckless driving, forest fires, etc.

INFORMATION BUREAU

You must know your Yellowstone if you are to enjoy it. Those who will not bother to ask questions miss many of the rewards of their visit.

The central information Bureau and Park Museum are located at Mammoth Hot Springs. Maps, publications relating to all of the National Parks of the United States, together with a supply of road maps, are available at this office. But there are uniformed rangers throughout the Park, and questions are gladly answered at hotels, camps, stores, and picture shops.

PROTECTION OF THE PARK—THE RANGER SERVICE

The Park is protected by the ranger force under the direction of the Superintendent. The principal duties of the rangers include the patrolling of the roads and trails, control of automobile traffic, protection of the geyser and hot-spring formations, sanitation of camps, etc., but they also answer inquiries and give general information regarding the Park as opportunity permits. Do not hesitate to consult the rangers. They are here to aid you. Ranger stations are situated near every hotel and camp and at every junction point on the road system.

POST OFFICE

Yellowstone Park, Wyo., is the address of the only post office in the Park. It is located in the large stone building at headquarters, Mammoth Hot Springs, back of the information office and museum. If you desire to have mail sent to you in the Park, ask the postmaster to forward the mail to you by the regular carrier service he maintains on the Grand Loop Road each day, or the postmaster will forward your mail to any hotel or permanent camp at which you may be a guest.

MEDICAL SERVICE

The medical service of the Park is conducted by a physician and surgeon, who is located at headquarters at Mammoth Hot Springs. He will, however, promptly attend patients anywhere in the Park. There is a modern hospital, splendidly equipped, at Mammoth Hot Springs, and ambulance service is available to the hospital from all parts of the Park. There are trained nurses stationed at all hotels and permanent camps, which are also provided with well-equipped dispensaries. In case of accident or illness requiring the service of a physician or nurse, you should proceed at once to the nearest hotel or permanent camp. If a ranger station is near, the telephone lines of the Park will be available for summoning medical service, and the Rangers on station will render all aid possible under the circumstances.

CAMPING GROUNDS AND SANITATION

A system of free automobile camping grounds has been developed in Yellowstone National Park. These are being provided with pure running water, firewood, garbage disposal facilities, and flush toilets. The camping ground at Mammoth Hot Springs also has shower baths and a small laundry for self service. However, you need not use these larger camp sites if you prefer solitude. Smaller camping grounds are easily recognized by the signs "Good Camp."

All camps, large or small, must be kept clean and sanitary. Leave a dirty camping ground and you will have to go back and clean it up, because the motorcycle patrol is very likely to catch you.

Be a good woodsman and put out your Camp Fire.

"Leave a clean camp and a clean record."

LUNCH ROOM SERVICE—DELICATESSEN

There are lunch rooms in the automobile camping grounds at Old Faithful, Fishing Bridge at the Outlet of Lake Yellowstone, and Mammoth Hot Springs; also in the Canyon store, in the store at Tower Falls, and in the Park Curio Shop at Mammoth Hot Springs. Cooked foods and package lunches are also available at these stations to visitors not wishing to eat in the lunch rooms.

HOUSEKEEPING CAMP SERVICE

In the automobile camping grounds at Old Faithful, the Fishing Bridge at the outlet of Lake Yellowstone, at Canyon, and at Mammoth Hot Springs, there are tents or cabins available, at small cost, to parties not wishing to set up their own equipment. These are equipped with double bedstead, springs, table, stove, bench, and washstand. Bedding and cooking utensils, dishes, etc. may also be rented at low rates.

STORES AND NEWS STANDS

You do not have to overstock your automobile with supplies secured outside the Park unless you have special reasons for doing so, as there are several stores in the Park carrying extensive lines of groceries, clothing, campers' supplies of all kinds, etc.

Stores are located at Mammoth Hot Springs, Old Faithful, West Thumb, Yellowstone Lake near the hotel and ranger station, Grand Canyon, and Tower Falls. There are also branch stores in several of the automobile camping grounds—at Old Faithful, Fishing Bridge, Tower Falls, and Mammoth Hot Springs. There is a curio shop and ice cream parlor at Mammoth Hot Springs where box lunches and meals are also available.

All stores, and hotel and permanent camp news stands, carry lines of curios and souvenirs.

PHOTOGRAPHS OF THE PARK

The official photographers, Haynes Picture Shops, Inc., maintain picture shops at Mammoth Hot Springs, Old Faithful, Grand Canyon, and Tower Falls, and picture stands in all hotels and permanent camps. Besides pictures in many sizes and styles, they have hand-painted enlargements, lantern slides, post cards, photographic supplies and guide books. They also have laboratories in the Park for developing, printing, and enlarging photographs for travelers.

GARAGES AND REPAIR SHOPS

There are storage garages at Mammoth Hot Springs, Old Faithful, Lake Hotel, and Canyon Hotel. At each of these points and at Tower Falls there are repair shops and automobile supply stations.

GASOLINE AND OIL

Gasoline and oil stations are connected with all general stores and repair shops, and are also located in the automobile camping grounds at the Fishing Bridge near the outlet of Lake Yellowstone.

TELEGRAMS

Telegrams may be sent from hotels and permanent camps to any part of the world. Motorists who are camping in the public camp grounds should send telegrams from the hotels.

TELEPHONE MESSAGES

Use of telephones in hotels, permanent camps, and stores from or to any point in the park, not to exceed one minute, 25 cents. For each additional minute, 15 cents. Long distance service is available.

THE BEARS GOOD FRIENDS PROVIDED YOU TREAT THEM FAIRLY

The bears of the Park are very interesting, and we are not surprised that you want to feed and photograph them, but you must remember that they are wild animals, and are **TREACHEROUS** and **DANGEROUS**.

Do not tease the bears by pretending you have food for them when you have none. You may get bitten.

If you want to see grizzly bears, you will usually find some at the garbage pits back of the Lake and Canyon Hotels at sundown or later. An armed ranger guards each pit, and you will be safe.

FISH AND FISHING

Yellowstone is the land of many waters, and the paradise of the angler. The game fish is the trout, his relative the grayling, and in one lake, the yellow perch. Almost every stream and lake is a trout water, and the supply is kept up by constant restocking. **THE DAYS LIMIT PER PERSON IS 10 FISH.**

In July, living bait takes your best fish. In August and September, artificial flies will fill your basket. Trouting is a game of wits and conditions. If you don't succeed, blame the trout, or blame yourselves, but don't blame Yellowstone Park, for its waters are swarming.

If some former Yellowstone visitor has told you the trout in Yellowstone Lake are not fit to eat, let us tell you officially that your advisor was misinformed. Occasionally a trout caught **IN LAKE YELLOWSTONE** is bound to harbor a small worm. This worm has been examined by noted scientists and found to be perfectly harmless.

WHY THE MOTOR FEE IS CHARGED

The automobile fee of \$3.00 or motor cycle fee of \$1.00 entitles you to use of Park roads and to the free use of the public automobile camp grounds, which have been developed at large expense to the Government. Combined ranger stations and community houses are available at Old Faithful, Yellowstone Lake, and at the Canyon Camp Grounds, where campers may receive information from the rangers and where they may congregate in the evenings.

The purpose of the fee is sometimes misunderstood because the average citizen is not familiar with the financial policy of Congress. Congress, while always willing to appropriate funds for the maintenance, protection, and improvement of the National Parks, asks that those who use and enjoy these playgrounds shall contribute toward their administration and upkeep. Of course, the public utilities of the Park are required to pay to the Government taxes on their franchises, and these charges are based on the volume of business transacted by these enterprises. All revenue derived by the collection of various fees (including automobile fees) and franchise charges is paid into the United States Treasury and an account rendered to Congress, but the money can not be expended in the Park. The automobile entrance fees are based on the mileage of automobile roads in the various parks and vary from 50 cents in some very small parks to \$3.00 in the Yellowstone where over 300 miles of road are available for the use of the motorist.

RIGHTS OF WAY ON ROADS

In driving on Park roads, YOU HAVE EQUAL RIGHTS WITH ALL OTHERS. The same necessary rules precisely that apply to you apply also to the transportation busses. Of course, ambulances here, as everywhere, have right of way which all men are glad to concede. So, also, Government cars on emergency trips. But these are the only exceptions.

The yellow cars of the Yellowstone Park Transportation Co. carrying passengers who have come by train are required to travel on schedule and should not be delayed. Should you not be driving your car at the maximum speed limits permissible, you should recognize an appropriate signal from drivers of the yellow cars and yield the right of way in order that they may continue on their regular schedule.

The Yellowstone Park Transportation Co. holds a franchise from the Federal Government authorizing it to conduct its transportation business on the Park-road system. It is a public utility under the strict control of the Government. National park authorities prescribe the character of service that this company must furnish the public, and all rates are fixed by the Director of the National Park Service.

THE SPEED LIMIT

Be sure you read all the automobile regulations and give particular attention to the rules that limit the speed at which cars may be operated. The limits are 12 miles per hour on grades and when rounding sharp curves; on good roads with straight stretches and when no vehicle is nearer than 200 yards, the speed may be increased to 25 miles per hour.

If these limits are exceeded by other motorists, or by drivers of the yellow cars of the Yellowstone Park Transportation Co., you will perform a public service if you would report violations of the regulations at the ranger stations or to the motor-cycle patrol, giving number of violators' cars for identification purposes.

AUTHORIZED RATES FOR PUBLIC UTILITIES

Remember that all rates are approved by the Government. Complaints regarding overcharges should be made to the Superintendent. Employees of the hotels, camps, and transportation lines are not Government employees, but discourteous treatment by public utility employees should be reported to the Park Administration.

YELLOWSTONE PARK HOTEL COMPANY

Hotels are located at Mammoth Hot Springs, the Upper Geyser Basin, the outlet of Yellowstone Lake, and the Grand Canyon of the Yellowstone.

Hotel Rates

Board and lodging, American plan, regular accommodations (not including private bath), per day, each person	\$6.50
Board and lodging, including private bath, according to the room's location and number of occupants, each person	7.50-11.00
Meals or lodging, part of a day:	
Lodging (rooms without bath)	2.25
Breakfast	1.25
Lunch	1.50
Dinner	1.50
Meals served in rooms, extra each50
Children under 8 years of age, half rate; children in arms free.	

THE YELLOWSTONE PARK CAMPS COMPANY

Permanent camps are located at Mammoth Hot Springs, Upper Geyser Basin, Yellowstone Lake, Grand Canyon of the Yellowstone, near Tower Falls (Camp Roosevelt), Lewis Lake, and at the Eastern (Cody) entrance.

Permanent Camp Rates

Meals and lodging, American plan:	
Per day	\$4.50
Breakfast	1.00
Lunch (at Sylvan Pass Lodge \$1.50)	1.00
Dinner	1.00
Lodging	1.50
Weekly rate	\$0.00
Meals served in guests' sleeping tents, extra each25
Children under 8 years of age, half rate; children in arms free.	

HOUSEKEEPING CAMP SERVICE

In the automobile camping grounds at Mammoth Hot Springs, Old Faithful, Fishing Bridge at outlet of Lake Yellowstone, and Grand Canyon.

Tent or cabin occupied by 1 person, per day	\$0.50
Tent or cabin occupied by 2 or more persons, per day, per person50
Children under 8 years of age, half rate; children in arms free.	
Tents and cabins are available furnished with the following equipment:	
Single; one bedstead, one bed spring, one stove, one wash stand, one table, one bench.	
Double; two bedsteads, two bed springs, one stove, two wash stands, two tables, two benches.	
Persons not having all their own camp equipment may rent the following items:	
Standard size mattress for two people, per day25
Blanket, per day25
Two sheets, two pillows, two pillow cases, two hand towels, per day40
Coffee pot, frying pan, each article per day05
Knife, fork, and spoon, per day05
Cup and plate, per day05

GUIDES, HORSES, AND CONVEYANCES

Saddle animals for riding trips of one day or less duration, from hotels and permanent camps (rates do not include guide service):

Per full day, 8 hours	\$3.50
Per half day, 4 hours	2.50
Per hour75

Mounted guides for saddle-horse parties:

Per day of 8 hours	5.00
Per half day of 4 hours	3.00
Per hour	1.00

Horses kept out over 8 hours will be charged hourly rates for each hour over the 8 hour period.

Personally conducted saddle-horse trips escorted by mounted guide are available from both hotels and permanent camps, except at Lake Yellowstone.

FISHING TRIPS

The following fishing trips are available from all permanent camps of the Yellowstone Park Camps Co.:

All day, 8 hours	\$5.00
Three-fourths day, 6 hours	4.00
One-half day, 4 hours	3.00

Rate includes saddle horse and mounted guide who personally conducts the party.

BATHHOUSE—UPPER GEYSER BASIN

(Henry P. Brothers, Proprietor.)

Bath in large pool, including use of bathing suit	\$0.50
Children between ages of 5 and 12 (less than 5 years, no charge)25

THE WONDERFUL GEYSERS OF THE YELLOWSTONE

ERUPTION TABLES

NORRIS GEYSER BASIN

Name	Height of eruption	Duration of eruption	Interval between eruptions	Remarks	Heat of water
	<i>Feet</i>				<i>°F.</i>
Black Growler				Steam vent only	185.9
Constant	15-35	5 to 15 seconds	20 to 55 seconds		188.1
Congress Pool				Large boiling spring	
Echinus	80	3 minutes	45 to 50 minutes		
Emerald Spring				Beautiful hot spring	193.9
Hurricane	6-8			Continuous	195.0
Minute Man	8-15	15 to 30 seconds	1 to 3 minutes	Sometimes quiet for long periods.	
Monarch	100-125	6 minutes	Irregular		
New Crater	8-25	1 to 4 minutes	2 to 5 minutes		
Valentine	60	15 to 60 minutes	Irregular		
Whirligig	10-15	Irregular	do	Near Constant Geyser	189.9

LOWER GEYSER BASIN

Black Warrior		Continuous		Small but interesting	
White Dome	40	1 minute	40 to 60 minutes	geysers	
Clepsydra	10-40	Few seconds	3 minutes		197.3
Fountain Geyser	75	10 minutes	2 hours	Irregular	
Firehole Lake				Peculiar phenomena	
Great Fountain	75-150	45 to 60 minutes	8 to 12 hours	Spouts 4 or 5 times	
Mammoth Paint Pot				Basin of boiling clay	202.8
Excelsior	200-300	About ½ hour		Ceased playing in 1888	193.3
Prismatic Lake				Size about 250 by 400 feet; remarkable coloring.	149.8
Turquoise Spring				About 100 feet in diameter.	

UPPER GEYSER BASIN

Artemisia	50	10 to 15 minutes	24 to 30 hours	Varies	
Atomizer	2				
Beehive	200	6 to 8 minutes	3 to 5 times at 12-hour intervals following Giantess.	Irregular	
Cascade				Quiet again	
Castle	50-75	30 minutes	Irregular	Quiet 4 to 7 days, then plays 3 or 4 times at daily intervals.	
Cub, large	60	8 minutes	With Lioness	Short chimneys to Lion and Lioness.	210.0
Cub, small	3-10	17 minutes	1 to 2 hours		
Daisy	70	3 minutes	80 to 90 minutes		188.4
Economic	20	Few seconds		Seldom in eruption	165.1
Giant	200-250	60 minutes	6 to 14 days		202.7
Giantess	150-200	12 to 36 hours	Irregular, 10 to 20 days.		200.7
Grand	200	15 to 30 minutes	10 to 12 hours		
Grotto	20-30	Varies	2 to 5 hours		201.0
Jewell	5-20	About 1 minute	5 minutes		
Lion	50-60	About 2 to 4 minutes.	Irregular	Usually 2 to 17 times a day.	
Lioness	80-100	About 10 minutes	do	Played once in 1910, once in 1912, once early in 1914, and once in 1920.	202.1
Oblong	20-40	7 minutes	8 to 15 hours		201.8
Old Faithful	120-170	4 minutes	60 to 80 minutes	Usual interval 65 minutes.	200.1
Riverside	80-100	15 minutes	6 to 7 hours	Very regular	201.2
Sawmill	20-35	1 to 3 hours	Irregular	Usually 5 to 8 times a day.	192.1
Spasmodic	4	20 to 60 minutes	do	Usually 1 to 4 times a day.	201.2
Splendid	200	10 minutes		Not played since 1892	199.9
Sponge		1 minute	3 minutes	A small but perfect geyser.	
Turban	20-40	10 minutes to 3 hours.	Irregular		

NOTABLE SPRINGS.—Black Sand Springs [199.3] (about 55 by 60 feet), Chinaman [200.1], Emerald Spring [193.9], Morning Glory [171.6], Punch Bowl [200.8], Sunset Lake.¹

THE GRAND CANYON OF THE YELLOWSTONE

Before the glacial epoch there was no Grand Canyon of the Yellowstone, and its place was occupied by a gently rolling country. But the melting ice poured so much water into Yellowstone Lake that it overflowed to the north, possibly finding a shallow depression where the Canyon is now. The rock at this point had been decomposed and softened by hot steam and gases, and the new river found it easy to dig a deep passage for itself. As the Canyon deepened and widened, the water flowed faster and Yellowstone Lake drained out to its present condition. This would have continued until the Lake disappeared entirely had not there been hard ledges of rock at the sites of Upper (109 feet high) and Lower Falls (308 feet high). The colors of the Canyon are due to uneven action of the hot steam and gases. In places all the white was removed, leaving the reds and yellows; in other places the reds, as well, were removed and only the yellow left; finally in some places all the reds and yellows disappeared and the white remained.

There are many animals about. While the deer and elk are numerous and interesting, it is the bears that hold one's thoughts. The black and brown bears are abundant here, and even the grizzlies (or silvertips) are common enough to be frequent before sunrise and in the evening.

Osprey (one prominent nest below Grand View and another below Inspiration Point) are always in sight in the Canyon; and very fine chances are afforded to watch the model home life of these wonderful birds.

Ten miles north is Mt. Washburn (10,317 feet), the highest remaining point of the old volcano that was chiefly responsible for Yellowstone Park, its hot springs and geysers, and its fossil forests entombed in volcanic mud. The old volcano is dead now, but its slopes are occupied by the most wonderful of wild flower gardens.

THE MAMMOTH HOT SPRINGS—THE GREAT TERRACES

Hot springs are common enough in various parts of the world; but in many ways the terraces at Mammoth Hot Springs are the most wonderful of all. The springs, themselves, are deep blue pools of great beauty; they are not actually boiling, although the discharge of large quantities of colorless gas gives them that appearance. When the water overflows, lime is deposited in a great variety of beautiful, rounded, sculptured terraces one below the other down the slope of the hill. Soon, algae (microscopic and primitive plants) make their appearance in a great variety of colors, and the terraces become a living mosaic of vivid reds, pinks, yellows, and greens with all possible gradations between. In many places, beautiful crystals are formed, and a leaf or an insect, falling in, is quickly coated with a pure white covering. The terraces are intensely interesting and well repay a close, careful study.

The oldest terraces are on Terrace Mountain, southwest of the present activity. Although the deposit is now hundreds of feet thick, we find tons of glacial boulders on top, and it seems quiet certain that the ancient glacier plowed away considerable of such a soft material. Such a deposit would require thousands of years to form; and since it began forming before the ice age, our hot springs must be a hundred thousand years old at least, perhaps much more.

All our data goes to show that there is a vast bed of still hot lava down below us. It heats the water and then forces it up through beds of limestone where much material is dissolved and brought to the surface to be redeposited by the hot springs. This redeposited material is "formation," a variety of limestone known to scientists as TRAVERTINE. It is deposited at the rate of an inch in fifty days; but, as the active springs cover only a part of Terrace Hill at one time, it takes much longer to add an inch to the average height of the formation.

LAKE YELLOWSTONE

Although Yellowstone Lake now covers 139 square miles or 88,960 acres, and is one of the largest lakes in the world at so great an altitude (7,735 feet above sea level); it was very much larger in recent geological times. Before the glacial epoch, Yellowstone Lake drained south through Heart Lake and Snake River into the Pacific Ocean. During the ice period, or shortly after, this exit became blocked, the water of the lake rose higher and higher until it was 160 feet higher than at present, flooded Hayden Valley, and even extended north to the site of the Canyon Hotel. At that time Yellowstone Lake covered 310 square miles, or more than twice its present size; but this increase brought with it, its own destruction. For the rising water found an outlet to the north along the line that is now the Grand Canyon, and flowed out until the lake was reduced to its present level. The greatest depth is now 300 feet. Its shore line is approximately 100 miles.

Yellowstone Lake is in the heart of the game country. Bear, deer, and elk are all about it, especially in the higher valleys. About the southern end of it is the home of the Yellowstone Moose, and in its waters are large numbers of otter, while many osprey nest along shore and seek their fish food in the lake itself.

Molly Island, at the southern end of the Southeast Arm, is the most eastern breeding ground of the White Pelican. 250 pair are nesting there, and also about a thousand California gulls.

Because it is possible to collect, hatch, and protect trout eggs better under artificial conditions than Nature can, a Fish Hatchery has been established near this hotel by the Bureau of Fisheries in cooperation with the National Park Service. During 1924, over 18,000,000 of these artificially hatched trout were distributed in Park waters for the benefit of future fishermen.

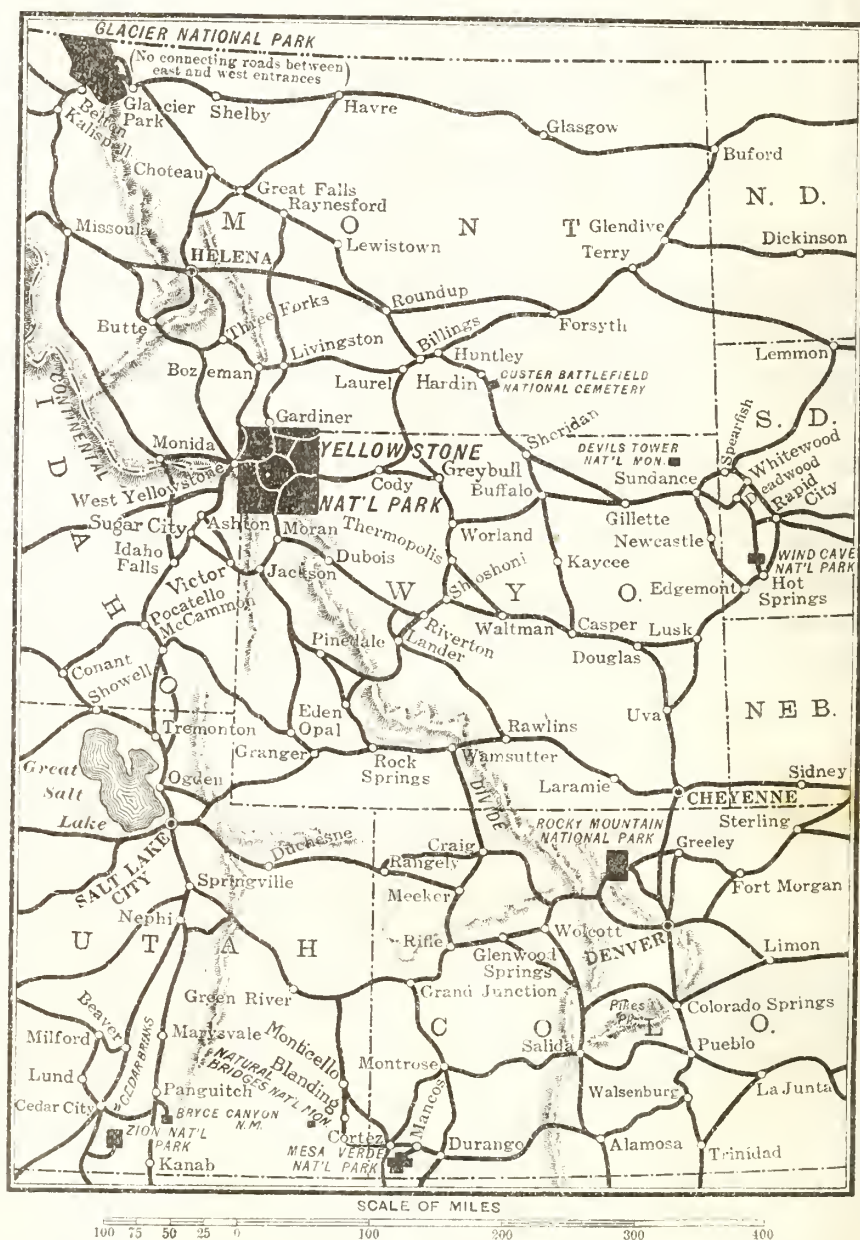

WHERE TO GO FROM YELLOWSTONE

Glacier National Park in Montana may be reached from Gardiner, the northern entrance, by following any one of the following routes:

The Glacier Yellowstone Beeline Highway via Livingstone, White Sulphur Springs, Great Falls, and Choteau.

The Flathead Valley Route via Livingston, Bozeman, Butte, Missoula, and Kalispell.

Glacier Park may also be reached from West Yellowstone, the west entrance, by traveling up the Gallatin Valley to Bozeman,

AUTOMOBILE ROADS BETWEEN YELLOWSTONE, GLACIER, ROCKY MOUNTAIN, WIND CAVE, MESA VERDE, AND ZION NATIONAL PARKS.

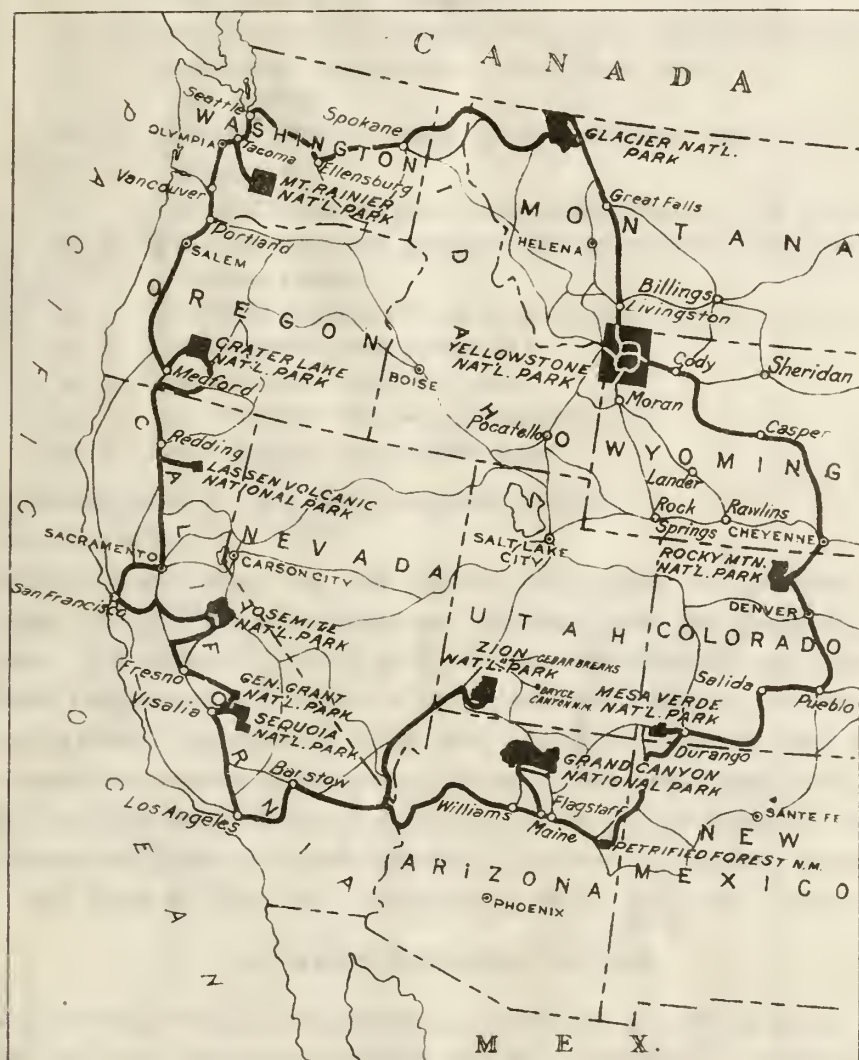

thence over the Geysers to Glacier Highway, via Three Forks, Helena, Great Falls, and Choteau, or by the Flathead Valley Route via Butte, Missoula, and Kalispell. Glacier is also reached from West Yellowstone via the Ruby Valley or the Valley of Madison River to Butte, thence via Missoula and Kalispell. Inquiry should be made at the West Yellowstone Ranger Station concerning road conditions.

Salt Lake City is also reached from West Yellowstone by following the main traveled road through Idaho via Ashton, Idaho Falls, Pocatello, and Ogden, Utah.

From the Cody or eastern entrance motorists may continue through Wyoming following the National Park-to-Park Highway to Cheyenne, where the Lincoln Highway is reached, and may continue south to the Rocky Mountain National Park and Denver.

Motorists may reach the National Parks Highway or Yellowstone Trail from Cody by turning north and following the main traveled road via Powell, Bridger, and Laurel to Billings, Mont.

At Billings the Custer Battlefield Highway is also reached.

MAP SHOWING NATIONAL PARK-TO-PARK HIGHWAY AND INTER-PARK ROAD SYSTEM.

From Cody motorists may continue east over the Black and Yellow Trail. This highway traverses the Black Hills of South Dakota, and a side trip to the Wind Cave National Park may be made from Rapid City, S. Dak.

From the southern or Snake River entrance motorists may travel the Wind River route over Twogwotee Pass via Dubois and Lander to Rawlins, Wyo., on the Lincoln Highway, thence to Denver.

From the southern entrance the Hoback Canyon Road via Jackson and Pinedale, Wyo., gives another route to the Lincoln Highway, reaching it at Rock Springs, Wyo.

From the southern entrance Idaho points and Salt Lake City may be reached via the road through the Jackson Hole country, thence crossing the Teton Mountains through Teton Pass. The main traveled Idaho highway is reached at St. Anthony.

Ask the park ranger for a large map of the National Park-to-Park Highway.

MOTORISTS GUIDE

Read and Use This Guide Constantly. Unless you do follow its advice and directions, you will not see and enjoy this great Park. Keep this guide because it cannot be replaced except at the Park entrances.

Help us to protect your great Park. Strictly observe Rule 1. Please report violations, particularly carving of initials on the beautiful and delicate Geyser formations.

YOUR PARK AND YOUR OBLIGATION

You have just entered Yellowstone National Park. You are within the portals of our largest playground, and the world's most amazing museum of volcanic phenomena.

The geysers, which here abound in greater numbers and magnificence than elsewhere in all the world, the sculptured Yellowstone Canyon, painted in all shades of the spectrum save blue, the great falls themselves dammed by granite dykes forced up through softer lavas, are eloquent of the tempestuous ages when all this region was torn with violent eruptions of volcanoes. Even the mountain profiles, and the soft rolling surfaces are shapings of lava by many waters.

Every mile of Yellowstone is a wild flower garden, and over 80 per cent of its area is heavily timbered with great forests of spruce, pine, fir, and other varieties of trees. There are hundreds of lakes and streams of pure mountain water. It is our greatest game preserve.

And this Park is yours. It was reserved in 1872 to be held forever for the benefit and enjoyment of the people of the United States. You, its owners, are free to see it and enjoy it in your own way. You may live in the hotels or permanent camps, or camp out with your own equipment and supplies. You may stay days or weeks, as you choose. You may fish where you will in its countless waters, climb its mountains, explore its canyons, study its wild life.

THE NATIONAL PARK SERVICE

The National Park Service is here to serve you. Its regulations are in **YOUR INTEREST** to protect **YOUR PROPERTY**. In this you, as prudent owners, of course, will help. You, too, will warn the careless, and report those who deface these priceless and irreplaceable exhibits; for here, as elsewhere, there are always some of that kind.

We, the uniformed guardians, are few, and this property of yours is vast—3348 square miles; so we need badly your watchfulness and help. Fire is our greatest enemy. Be careful with fire in the woods. One great fire, started even by a cigarette stub, could ruin the beauty of the Yellowstone for a hundred years.
